

## Notice to Flyers

### No overnight camping without authorization from

### President or Vice President

Due to concerns of security, field maintenance, the planted crop, and with respect for our Landlord, The Vernon Radio Control Aeromodellers Society has made some changes over past practices concerning parking at our two annual events.

For the Annual Larry Christensen Memorial Fun-fly no onsite parking will be allowed before 12:00pm Tuesday before the event. Field maintenance is in the morning.

Some rules also apply.

Trailers may not be dropped off. They must be attended every day that they are at the field. (This does not mean that you cannot go into town for a meal or an evening of recreation.)

At the LCMFF, Trailers may remain on the site until Tuesday morning after the event.

Parking spaces cannot be reserved. First come, first served. *Except for event Officials, or persons with special circumstances, with the approval of the event director, trailers will not be parked in the area south of the club house.* The five spaces nearest the turn around area next to the toilets will be reserved for tents only. The remainder of the area south of the club house will be set up for picnic tables and local vehicle parking.
